

Continual Cleaning that adapts to facility needs

Epa registered - OR - Certified Green

Trench Clean is a time-release cleaning product, that can be used at any point of the trench or slot drain. Prevention is always the best practice. Trench Clean makes it easy and adaptable.

Shock Control Disk

For continual cleaning where it's needed most, pull the excess yellow fabric of the polymer cleaning block through the center of the reusable disk, then tie off the fabric. In highly trafficked areas where the disk isn't feasible, we also provide visible yellow zip ties.

When water contacts the Trench Clean surface, it activates specialized cleaning agents that effectively maintain drains. A polymer block, suspended by a high-quality knit fabric, is anchored in place by a durable shock control disk that is secured above the trench grate or slot drain.

- Adaptable
- Use where it's needed most
- Easy to use
- Water activated
- For trench and slot drains
- Various sizes/knit colors available
- Typically lasts 30 days, dependant on water volume.

EPA Registered Trench Clean

- Proprietary biocide formulation
- Controls the Growth of Fungi, Mildew, Slime, and Algae.
- Most recent EPA certification in April, 2022
- Emulsifies oils, soils, and sludge
- No excessive foaming
- Works continuously to clean trench drains
- Keeps the trench free of food-waste residues that harbor harmful microbes

USDA-NSF certified green Trench Clean

- Good for the environment and for trench health
- A blend detergents, inhibitors, and stabilizers
- Emulsifies oils, soils, and sludge
- No excessive foaming
- Works continuously to clean trench and slot drains
- Keeps trench drains free of food-waste residues that harbor harmful microbes
- Various sizes available

Use Trench Clean with **Drain Rings** to treat the trench and the drain. Visit [DrainRings.com](https://www.DrainRings.com) to learn how.
