

Next Gen Drain Rings VS High Volume

Drain Rings Clean Continuously

Drain Rings are a time-release±, non-dissolving cleaning product, that sits directly in the drain to treat water as it flows into the drain. Prevention is always the best practice. Drain Rings makes it easy with time-release± cleaning.

High Volume

Designed for areas that have a high volume of water going down the drain.

- **Continuous Cleaning:** Drain Rings clean continuously in the presence of water
- **Efficiency:** The same cleaning power from day one through replacement.
- **Strength:** Contains more of our proprietary formula to target areas with higher water volume.

Next Gen Drain Rings

Designed for areas with typical water volume drain usage.

- **Cleaning Power:** Water activated to clean drains as water touches Drain Rings surface.
- **Enhanced Fit:** The foam spacer conforms for a snug fit.
- **Durability:** Plastic band reinforcement, prevents product breakage.
- **Buoyancy:** Designed to float, for added surface contact and slippage prevention.

Prevent drain buildup, clogs, and odors with one simple step.
